

ISS Hand-off

All ISS arrays are in the H2 PSL enclosure under C3 and Foil along with hardware for the storage containers.

Hardware for storage containers. (See D1400368 v2) C'bore washers and PD array face-plates v2. In the background of the pic you can see a storage container cover.

The 2 arrays to the left are for AEI, the 2 in the middle are LLO and the 2 to the right are LHO.

Storage container lids are on the shelves in the anti-room. Gaskets are on the second shelf in the middle. Handles and filters are on the third shelf to the left. Tool kits and align tooling are to the right.

One storage container is on the shelves just inside the air shower on the second shelf to the left. The spare PD array cover and spare strain relief assembly are on the right.

Spare parts are in the bins on the floor next to the second set of shelves.
