

Second scale delays between buildings in seismic and acoustic signals

Fs=259Hz, secFFt = 0.30, overlap = 0.66, ft length=76, # FFT = 195, bw = 3, in samples = 5K, low = 0.20

Fs=16,384Hz, secFFt = 0.30, overlap = 0.67, ft length=4,915, # FFT = 198, bw = 3, in samples = 309K, low = 0.20

Content between 0.5 and 30 or 40 Hz

Biggest thing in the 3-10 Hz band in the last month
