

L1:IMC-WFS A | PITYAW QUADSUM - Composite Estimated Ambient (Coupling factors chosen based on loudest injection at each frequency)

Ambient estimates are made by multiplying coupling factors by injection-free sensor levels.
CIRCLES indicate estimates from measured coupling factors, i.e. where the injection signal was seen in the sensor and in DARM.
TRIANGLES represent upper limit coupling factors, i.e. where a signal was not seen in DARM.
