

Gaussian Process Regression for Unknown Systematic Error

H1, ETMX UIM Actuation Function Measurement Residuals with 2019-09-09 Model

UIM: Posterior kernel $0.316^{**2} * \text{RBF}(\text{length_scale}=1.5) + 0.949^{**2}$

Log-likelihood = 519.526, fit range = 6-50 Hz
