

Gaussian Process Regression for Unknown Systematic Error

H1, ETMX PUM Actuation Function Measurement Residuals with 2019-09-09 Model

PUM: Posterior kernel $0.316^{**2} * \text{RBF}(\text{length_scale}=0.5) + 0.949^{**2}$

Log-likelihood = 874.479, fit range = 6-400 Hz
