

Gaussian Process Regression for Unknown Systematic Error

H1, ETMX TST Actuation Function Measurement Residuals with 2019-09-09 Model

TST: Posterior kernel $0.316^{**2} * \text{RBF}(\text{length_scale}=0.5) + 0.949^{**2}$

Log-likelihood = 1362.956, fit range = 6-1000 Hz
